(54) Title: A REAR PROJECTION TELEVISION RECEIVER OPTICAL SCREEN MOUNTING SYSTEM

(57) Abstract: A mounting system for an optical display screen of a rear projection television receiver, provides tension to the optical display screen thereby eliminating, or substantially reducing any tendency of the optical display screen to bowing or curvature. Elastic mounting bracket assemblies are attached, using an appropriate adhesive, to the periphery of the optical display screen at strategically optimum positions. These mounting bracket assemblies are then stretched to engage corresponding mounting bosses formed in the housing of the rear projection television receiver, thereby imparting a stretching force on the optical display screen.
